

**Difficulty**Beginner

Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users.  $\triangleright$ 

| The Phases  High-level steps your user needs to accomplish from start to finish | Input<br>Image   | Recognize image                   | Predic the disease                                  | Recommend<br>Fertilizer   |
|---|--|-----------------------------------|---|---|
| 2 Steps  Detailed actions your user has to perform                              | need for good crop from diseases  Monitoring of plants for from diseases | Upload the images in the UI image | Test the disease that image the plants are affected | Get the fertilizer recommendations from the UI  Reduce loss due to post predictions |
| 3 Feelings What your user might be thinking and feeling at the moment           | Simple   | Follow the methods properly       | Understand the usefulness of the application        | Satisfied by this service   |
|   | Difficult  | Complex to use                    | Feels<br>worthless                                  | Dis-Satisfied by the service  |
